SUMMARY

Backend Engineer with 3+ years of experience designing distributed systems, microservices architectures, and cloud-native infrastructure on AWS. Proven expertise in scalable REST and GraphQL API design, event-driven architecture, database design, and CI/CD automation for high-concurrency, high-availability production systems.

EXPERIENCE

Justdial Ltd.

Jan 2026 – Present

SDE-1

Bengaluru, India

- Designed a centralized **API Gateway** with dynamic routing across 10+ backend services using Node.js and Express.js, improving deployment flexibility and enabling independent service rollouts.
- Built an **event-driven observability pipeline** with Slack-based alerting and triggered log analysis across 7 servers; cut mean time-to-detect (MTTD) by **~40%** via hourly automated alerts.
- Implemented **load balancing and Redis caching** (Pub/Sub + caching layer) for the IRO management platform, reducing average API response time under peak load by **35%**.
- Applied **system design** principles to architect a WebRTC + third-party calling service integration for internal communication workflows, owning API integration and delivery end-to-end.

Mypcot Infotech Pvt. Ltd.

May 2024 – Dec 2025

Software Engineer

Mumbai, India

- Led full **monolith-to-microservices migration** on AWS ECS using **event-driven architecture** (SQS/SNS) and GraphQL APIs; improved fault isolation and reduced system-wide downtime by **5x**.
- Designed fault-tolerant **GraphQL and REST APIs** with Node.js, Express.js, and AWS API Gateway, implementing rate limiting and retry logic to sustain **10,000+ RPS** in production.
- Deployed infrastructure with ALB, Auto Scaling Groups, and AWS CodeDeploy, achieving **zero-downtime deployments** across all production releases.
- Built end-to-end **CI/CD pipelines** with GitHub Actions and Docker, including automated integration testing; reduced deployment cycle time by **80%** and cut release failures to near zero.
- Implemented **distributed caching** using Redis (stale-while-revalidate, write-through) across API layers, eliminating **60%** of redundant backend calls and reducing average database load.
- Architected a real-time emergency dispatch system (Shuffgroup) with geospatial MongoDB queries and WebSocket push for sub-second alerts; cut API latency by **40%** via Redis caching, validated under load with JMeter.

Weboccult Technologies

Jan 2023 – May 2024

Backend Engineer

Ahmedabad, India

- Designed and shipped RESTful backend services from scratch using Node.js, Express.js, and MongoDB with **event-driven patterns**; owned data modeling, API contracts, and system design for 3+ client products.
- Engineered a real-time video communication service using Twilio Programmable Video and WebRTC, optimizing session management to increase average user session duration by **25%**.

SKILLS

Languages	: JavaScript (ES6+), TypeScript, Python, PHP
Backend	: Node.js, Express.js, GraphQL, REST APIs
Architecture	: Microservices, Event-Driven Architecture, Distributed Systems, System Design
Databases	: MongoDB, MySQL, PostgreSQL, VectorDB, Redis (Pub/Sub, Write-Through)
Cloud & DevOps	: AWS (EC2, Lambda, S3, API Gateway, ALB), Docker, GitHub Actions, CI/CD
Observability	: Distributed Tracing, Load Balancing, Auto Scaling, Alerting Pipelines
ML / AI	: LLM Integration (OpenAI API), GenAI, VectorDB, Prompt Engineering
Testing & Tools	: Jest, JMeter, k6, Postman, Git
Frontend	: React.js, React Query, Material-UI

PROJECTS

Vaidya Assist | *Node.js, Express.js, React.js, MongoDB*

- Built a healthcare AI assistant using LLMs with **prompt engineering**, **intent classification**, and **RAG** for context-aware medical triage, doctor discovery, and slot booking; cut appointment booking time by **60%**. [GitHub](#)

Vedincharyaa — Vedic Wisdom Platform | *Node.js, TypeScript, OpenAI API, VectorDB*

- Integrated **OpenAI API** with prompt-engineered context windows and **VectorDB semantic search** for contextual commentary generation; built a spaced-repetition (Leitner) engine that boosted retention by **40%**. [GitHub](#)

EDUCATION

Birla Vishvakarma Mahavidyalaya (B.Tech.)

2019 – 2023

Electronics Engineering

CGPA: 7.6

ACHIEVEMENTS

- Awarded **Employee of the Month** at Mypcot Infotech for leading microservices migration and zero-downtime deployment infrastructure.
- Solved **250+ DSA problems** across LeetCode and HackerRank, focused on graphs, dynamic programming, and system design patterns.
